EXPERIENCE

Trilogy (learnwith.ai)

Technical Product Manager – FEB 2024 – DEC 2025

Led product discovery and delivery of edtech products - TeachTap and Athena, with the vision to enable students to learn twice as fast in only ~2 hours per day.

- Owned AP and SAT test prep features for TeachTap (**120K+ downloads, 4.5 stars**), resulting in **35%+ user retention and 100%+ ROAS**.
- Drove cross-functional delivery (engineering, design, content) to sustain a high-velocity cadence of 2 releases per week.
- Pivoted to a new web-based product (Athena) that provides an end-to-end learning platform for schools.
- Applied evidence-based learning principles (mastery-based learning, spaced repetition, retrieval practice), enabling students to complete AP courses **4x faster with a high score of 4-5**.
- Built internal LLM-powered workflows automating **~80% of documentation, ticketing, and testing**, significantly increasing team velocity.

Forgefiction Inc.

Product Manager: Mythrill - Fantasy and sci-fi reading app – JULY 2022 – NOVEMBER 2023

As the first PM hire, I owned product discovery and delivery, as well as data analytics end-to-end.

- Built a mobile-first product development process, enabling bi-weekly releases with clear metrics and outcome tracking.
- Completed data analytics instrumentation (Firebase, GA4, Looker), translating ambiguous business goals into clear KPIs.
- Partnered with marketing to optimize the mobile onboarding and activation flow, increasing activation **3x to 50%**.
- Worked on leveraging AI (translation and text-to-speech) to provide daily new chapters for **1000+ readers**, resulting in a **3X** increase in **retention** and **2x revenue**.
- Created a web platform from scratch to allow authors and editors to collaborate and publish content by themselves, **reducing time spent** on managing all that by **~80%**.

Picsart Inc.

Product Manager – JAN 2020 – MAY 2022

As a Product manager, I was responsible for defining and driving the roadmap of the Content Discovery and Notification teams, relying on qualitative and quantitative research.

- Improved the system of tagging and delivery of content that resulted in a **5x increase of the user-generated content** library.
- Introduced new premium features that generated a **5% increase in revenue (~5M revenue impact)**.
- Conducted extensive testing and experimentation, including A/B testing, to optimize product performance and growth.
- Helped form and communicate group goals, KPIs, and outcomes to stakeholders.
- Handled multiple partnerships with external stakeholders to ensure alignment and seamless product integration with Pinterest, Shutterstock, and others.
- Mentored new Associate PMs.

Associate Product Manager – JULY 2019 – DEC 2019

As an APM, I worked in several teams within the company and delivered multiple improvements in the editor, monetization, and network effect teams.

- Managed documentation, product requirements, sprint planning, and design briefs to ensure successful product development and delivery.
- Performed competitive analysis and market research to inform strategy and individual features.
- Conducted online and offline user interviews to generate and validate ideas.

Android Developer – MAY 2016 – JULY 2019

Worked on Picsart's video editor, as well as standalone apps such as Fonty, Animator, etc.

- Developed and shipped production-grade native Android apps (Java, Kotlin, Android SDK), contributing to feature development, performance improvements, and release cycles for apps used by millions.

EDUCATION & TRAINING

American University of Armenia

Bachelor of Computer Science (BS CS) 2014 – 2018

Growth Series - Reforge SEP-OCT, 2022

UX workshop SEP 2019, *Picsart*

APM Program 2019, *Picsart*

Java, Android 2016, *Armenian Code Academy*

TOOLS

Documentation & Management: Jira, Docs, Notion, etc.

Design & Wireframing: MIRO, Figma, Adobe CC, Balsamiq, LLM agents

Testing & Analytics: Firebase, Mixpanel, Google Analytics, Looker Studio, BigQuery, Hotjar, SQL

AI & Automation: LLM agents, prompt pipelines, Cursor, StackAI

Customer feedback: SurveyMonkey, Typeform, Research candidate sourcing

Android & Programming: Java, Kotlin, Android SDK, Google Play Console, Firebase, staged rollouts, A/B testing, git

Marketing & CRM: Meta/Google Ads, Hubspot, Landing pages

SKILLS

- Prioritization
- Data visualization and outcome measurement
- Growth & experimentation (A/B testing)
- User research
- AI-enabled product development
- Product strategy and roadmapping
- Agile software development
- Cross-functional leadership

LANGUAGES

English - advanced, **Russian** - advanced, **Spanish** - intermediate, **Armenian** - native
